

SCV SYSTEM

SCV SYSTEM

As smart card technology has evolved over recent years as a method of prepayment for public transportation, so has the Wayfarer product range, and with ten years' experience with this technology - Wayfarer is a market leader in the field.

The Wayfarer Smart Card Validator, (SCV), has been designed to be as flexible as possible and can be positioned either adjacent to or remote from Wayfarer Ticket Machines. Its features include an in-built ITSO compatible Smart Card Reader.

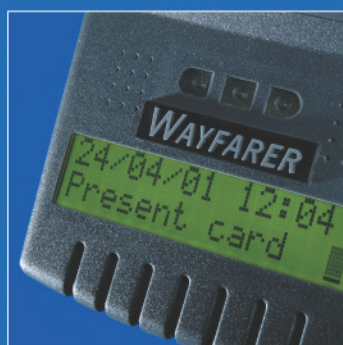

The unit is suitable for use on all types of public transport vehicles and applications, and can be operated in conjunction with any of the range of Wayfarer Electronic Ticket Machines, or in a "stand alone" mode.

The SCV reduces the need for cash handling, and therefore ultimately speeds up passenger boarding and movement. Smart Cards also enable companies to implement specific ticket marketing policies and to improve customer loyalty, thereby potentially increasing revenue flow.

Features include:

- All types of Contactless Smart Card can be read.
- The SCV can read cards up to 50mm away from the Reader.
- ITSO Compatible Contactless Reader with integral passenger display, card transaction lights and a speaker to give an audible signal.
- Integrates with all Wayfarer Electronic Ticket Machines or it can be operated in a "stand alone" mode.
- Can be used to interface with turnstiles or any form of barrier control.
- Easy to install and maintain.

SCV SYSTEM

Like all Wayfarer products, the SCV is produced to the highest standards and offers the operator the flexibility to respond to changing customer needs in today's competitive market environment.

Basic Technical Specification

Size: H244mm / D115mm / W130mm

Weight: Dependent on specification

LEDs: One red, one amber and one green

LCD Passenger Display:
2 rows x 16 characters, 8mm high with LED backlighting

Card Format: The SCV can be supplied to interface with a variety of Contactless Smart Cards to meet the customer's requirements including ITSO, Type A or Type B
